

**Fast, Smooth and
Accurate Seat Grinding**

The B & D 'VIBRO-CENTRIC' Valve Seat Grinding Method will give you fast, smooth and accurate seat grinding on any type of plane, car, or commercial vehicle. Used with the Valve Master Refacer to grind the valves the result is a perfect fit between the valve and the seat. To reach awkward seats on radial engines the 'Vibro-Centric' is available as a long spindle driver. For quick and accurate engine reconditioning, use Black & Decker valve grinding equipment.

OBTAINABLE only from B & D Distributors
