

THE VALVEMASTER REFAKER

Precision is the keynote of the Black & Decker Valve-Master Refacer. Embodiment of the newest

engineering principles ensures smooth running, finger-tip control and absolute freedom from vibration. A well devised coolant system guards against distortion.

The Valvemaster Refacer is designed to meet the demands of both modern production and maintenance. With the Vibro-Centric Valve Seat Grinder the Black & Decker Valve Shop offers the most up-to-date system of engine reconditioning.
